Contents of Volume 4

METHODS & DESIGNS

A pseudoperceptual display system for investigating human statistical decision processes by G. Lowe and M. Marsh, 1

CIE x,y coordinates from an inexpensive projection colorimeter by Gerald M. Murch, 3

Conditioned suppression as a psychophysical technique for the cat by Michael S. Loop and Mark A. Berkley, 121

The measurement of human oral forces by John D. Rugh and William K. Solberg, 125

A new probe technique for the identification of serial learning processes by Carla J. Posnansky, William F. Battig, and James F. Voss, 129

President paragraphs by Norman H. Anderson, Barbara K. Sawyers, and Arthur J. Farkas, 177

Exact procedures for the analysis of multidimensional contingency tables by Juliet Popper Shaffer, 231

Laser optometer incorporating the Badal principle by Robert T. Hennessy and Herschel W. Leibowitz, 237

A comparison of five methods of illusion measurement by Stanley Coren and Joan S. Girgus, 240

The statistical evidence for negative transfer in part-whole free recall by Michael S. Humphreys and Robert M. Schwartz, 287

Sources of variability in apparent-contrast measurements made by brightness matching by Thomas R. Corwin, 292

A precise method of measuring fixational eccentricity using the Maxwell spot centroid by Gillray L. Kandel and Harold E. Bedell, 295

Inhibitory stimulus control of the classically conditioned nictating membrane response of the rabbit by Frederick W. Mis, Augustus R. Lumia, and John W. Moore, 297

INSTRUMENTATION & TECHNIQUES

Two discrimination test apparatuses for primates by D. M. Rumbaugh, C. L. Bell, and T. V. Gill, 6

A method for the precise switching of speech by John A. Rupf, George W. Hughes, Stephen V. Rowson, and Kenneth F. Ruder, 11

Measurement of acoustic startle response in mice by Charles Wilson and Philip M. Groves, 13

A device for presenting targets and recording positioning responses in one dimension by John J. Uhlarik, 15

A technique for measuring eye-foot coordination without visual guidance by H. H. Mikaelian, 17

Social validation of an objective measure of dominance in captive monkeys by Steven B. Christopher, 19

An apparatus for the detection and counting of mouse squeals by Morris K. Morgret, 21

Videotape as a replacement for the human observer in studies of nonhuman primate behavior by Douglas K. Candland, Lawrence Dresdale, Jeffrey Leiphart, and Carl Johnson, 24

A method for determining the aversive threshold in the rat using repeated measures: Tests with morphine sulfate by Vincent P. Houser and William P. Paré, 135

The squeal as an indicator of aggression in mice by Morris K. Morgret and Harold A. Dengerink, 138

An inexpensive pure-tone pattern generator by Maurice E. T. Swinnen and Norman A. Krasnegor, 140

Measurement of social dominance in squirrel monkeys by Lincoln D. Clark and Edwin N. Nakashima, 143

An apparatus for operant conditioning of *Octopus cyaneus* Gray by R. S. Hales, Pamela Crancher, and M. G. King, 145

Out of the frying pan into the goalbox by Leonard Brosgole, Sonya K. Sobrian, and Angelo F. Contino, 147

A logarithmic electronic integrator for activity transducers by W. T. Woodard, 149

A circuit to permit an electronic drinkometer to operate during footshock by Charles R. Crowell and Lloyd Frei, 193

Editing silent hesitation from speech recordings by A. I. Henderson and D. G. Smith, 195

A device for the easy administration of volatile anesthetics to rats undergoing stereotaxic surgery by Lynn T. Kozlowski and Stephen C. Woods, 197

A system for cutaneous electrical stimulation mimicking touch by Kristin R. Carlson and Lucian J. Spalla, 199

Avoidance conditioning of general activity in the goldfish by Philip Greenway and M. E. Bitterman, 201

Conditioned suppression in the gerbil by Peter Frey, Sandra Eng, and William Gavin, 245

Generating complex waveforms by Richard V. Wolf and Robert C. Bilger, 250

A comparison of leverpress and head-poke discriminated Sidman avoidance by Philip F. Carrigan, James O. Benedict, and John J. B. Ayres, 301

Pause adjustment mechanism and measurement system (PAMMS) by Paul J. Jensen, Kenneth F. Ruder, and Wayne D. Harrington 304

An easily built and inexpensive apparatus for generating electroconvulsive shock by Dominic J. Zerbolio, Jr., and Robert E. Hubbard, 313

A device to record gross motor movements in human subjects by David L. Elwood, 315

A digital programmer for use with audio tape decks by Ronald H. Hopkins, 317

The lickometer: A simple device for the analysis of licking as an operant by A. M. Wall, G. C. Walters, and R. S. England, 320

Electronic holding relay for control of ac and dc circuits by David O. Pettijohn and E. C. T. Walker, 323

COMPUTER TECHNOLOGY

A 4-K computer language for experimentation with human subjects by Theodore J. Doll, 27

Detailed recording of spontaneous rapid events by Ronald P. Larkin, 32

National Conference on the Use of On-Line Computers in Psychology

Editorial by Joseph B. Sidowski, 41

Introductory remarks by Donald I. Tepas, 42

Various uses of minicomputers in psychology by Joseph B. Sidowski, 43

The use of time-shared terminals in psychology by Bert F. Green, Jr., 51

Misuse, abuse, overuse, and unuse of on-line computer facilities by psychologists by William R. Uttal, 55

Using the Lab-8 for experimentation with the human visual system by John C. Armington, 61

The Lehigh Valley INTERACT: An operant research computer system for the noncomputer jockey by Alan C. Kamil and Robert A. Sacks, 64

Computerized animal intelligence testing by John W. Davenport, Robert W. Benson, William W. Hagquist, Gene R. Rankin, and Steven E. Shelton, 67

Using the PDP-12 in verbal learning and short-term memory research by Bennet B. Murdock, Philip O. Dufty, and Ronald Okada, 70

PDP-8/LVE INTERACT system in an undergraduate environment by H. Keith Rodewald, 73

The General Automation 18/30 as a system for the general analysis and acquisition of data in physiological psychology by Robert M. Chapman and John A. Chapman, 77

Time-shared control of a variety of psychological laboratories using the IBM 1800 data acquisition and control computer by Paul Ellen, C.

Herbert DeLoache, and Joseph Bonds, 81
Computer-managed instruction: IBM System 360 by John A. Connolly and Thomas F. Lambert, 85
On-line computing with the Hewlett-Packard 2116B moving-head disk operating system by E. C. Carterette, A. Barnebey, J. D. Lovell, D. C. Nagel, and M. P. Friedman, 89
COGLAB: A computer system designed for human research by Richard L. Taylor, 94
The computer laboratory for instruction in psychological research, CLIPR by Daniel E. Bailey, 95
Training mathematical psychology students in the use of a laboratory computer by Frank M. Goode, 96
Toward the on-line analysis of raw bioelectric signals: The case of EEG by D. G. Whitmore and L. R. Gordon, 98
Some comments on connecting a small on-line computer to a large data processing machine by John O. Aikin and Richard B. Millward, 99
AVALA, a small on-line system with off-line communication with a large computer by Joseph L. Young, 100
Hardware and software considerations in using a LINC-8 computer in a behavioral toxicology laboratory by G. A. Van Gelder and Ron Munsinger, 101
CRT displays in the experimental psychology laboratory by Peter Van Gelder, 102
A brief description of EXTENDED SCAT by Peter G. Polson, 104
Combining FOCAL and Assembly language by William Siegel, 105
8TRAN language and the PDP-8 facility at the L. L. Thurstone Psychometric Laboratory by Thomas S. Wallsten, 107
GASPS: A General ASynchronous Processing System for the PDP-8 by Thomas D. Wickens, James Howard, Glenn Rice, and Richard B. Millward, 108
The PLANIT computer-assisted instructional language: A potential tool of research in psychology by M. A. Rahimi and T. A. Fino, 109
Operant behavior as an optimally controlled process by Michael F. Halasz, 112
Measuring cooperation and competition in decomposed games by James W. Livingston, Jr., 113

Digital generation of acoustic stimuli by John D. Lovell and Edward C. Carterette, 151
Three subroutines for dealing efficiently with permutations by William P. Dunlap, 159
Automated problem solving for the behavioral sciences by B. James Starr, 161
Painless computer-controlled experimentation by A. B. Durell, 165
Computerized process control in behavioral science research by Karl W. Scholz, 203
SNP: A system for nonadaptive procedures by Walt Jesteadt, 209
A FORTRAN IV program for analyzing higher-order subjective organization units in free recall learning by James W. Pellegrino, 215

BASIC subroutines for on-line experiments using Hewlett-Packard computers by William J. Ray and James H. Hogge, 218

SIMPLE guidelines for developing a computer-based laboratory by Doris Aaronson and Steven Brauth, 257
ASPA: Automatic speech-pause analyzer by D. Gerver and G. Dineley, 265
Analysis of variance of one-, two-, and three-treatment designs for a PDP-8 by Robert Breaux, 271
A "hand-shaking" multiplexer for the IBM 1800 by Shiv Verma and Emanuel Donchin, 327
An interface for transmitting discrete response information to a computer by Roland F. Miller and Peter G. Polson, 331

PRINTOUT
Products by Joseph B. Sidowski, 35, 167, 219, 273, 334

Briefs by Joseph B. Sidowski, 37, 274, 338

NOTES
A device for recording aggressive contact between animals by David S. Berg and Ronald Baenninger, 39
A simple rodent restraining cage by D. E. Anderson and Paul Herman, 40
Inexpensive FET audio switch by Lloyd J. Frei, 173
Factors affecting electroshock seizure thresholds in rats by Cynthia Greenspan and Richard L. Sprott, 173
Stabilized construction of a Hebb-Williams maze by Paul Abplanalp, 174
A superior method for constructing a shock grid for rats by Roger M. Tarpy, 175
Erratum, 198
A simple tail removal procedure for studying the role of the tail rattle in mouse aggression by M. K. Morgret, 224
A device for dispensing small animals by D. A. MacNeil, M. M. Gower, and A. Kuehn, 225
A digitally programmable attenuator by Richard V. Wolf, 278
Inexpensive metabolism cages and drinking tubes by Dennis C. Wright and Stephen W. Scheff, 279
Automatic measurement of food competition in the laboratory rat by Dominic J. Costanzo and David Hothersall, 338
Some determinants of performance in a commercially available one-way avoidance chamber by David L. Morse, Harriet Feinman, and Gerard A. Dizinno, 340
Clarity of Haidinger's brushes as a function of luminance by Stanley Coren and Clare P. Kaplan, 341
An approach to operating systems for computer-controlled behavioral research by Dennis O. Kuch, 342
